Volume 2, 1988

Efficient Mapping and Implementation of Matrix Algorithms on a Hypercube, V. Cherkassky and R. Smith 7

Context Flow: An Alternative to Conventional Pipelined Architectures, N.P. Topham, A. Omondi, R.N. Ibbett 29

Maze Routing on a Hypercube Multicomputer, Y. Won and S. Sahni 55

A New Hierarchy of Hypercube Interconnection Schemes for Parallel Computers, S. Lakshmivarahan and S.K. Dhall 81

Glossary of Terms 109

An Introduction to a Formal Theory of Dependence Analysis, Utpal Banerjee 133

Compiling Programs for Distributed-Memory Multiprocessors, David Callahan, Ken Kennedy 151

Compiling Parallel Programs by Optimizing Performance, Marina Chen, Young-il Choo, Jingke Li 171

OR Parallel Execution of Prolog Programs with Side Effects, Laxmikant V. Kale, David A. Padua, David C. Sehr 209

Program Parallelization with Interprocedural Analysis, Zhiyuan Li, Pen-Chung Yew 225

An Algebraic Model for Divide-and-Conquer and Its Parallelism, Zhijing G. Mou, Paul Hudak 257

Fine-Grain Compilation for Pipelined Machines, Alexandru Nicolau, Keshav Pingali, Alexander Aiken 279

Toward Auto-Scheduling Compilers, Constantine D. Polychronopoulos 297

Programming Language Constructs for Highly Parallel Operations on Lists, Jon A. Solworth 331

Programming Aid for Hypercube Architectures, Min-You Wu, Daniel D. Gajski 349

Microtasking General Purpose Partial Differential Equation Software on the CRAY X-MP, Michael Bieterman 381

A Multi-Algorithm Approach to Very High Performance One-Dimensional FFTs, Jim Armstrong, ... 415

A Balanced Bin Sort for Hypercube Multicomputers, Youngju Won, Sartaj Sahni 435
